These Merchandisers are designed for use in stores where temperatures and humidity do not exceed 75°F and 55% R.H. (We reserve the right to change or revise specifications and product design in connection with any feature of our products. Such changes do not entitle the buyer to corresponding changes, improvements, additions, or replacement of equipment Previously sold or shipped.)

Top Air Exhaust

MMR-42

MMR-46

MMR-54

Applications:

- Deli
- Produce
- Bakery
- Front End

Features

Rear exhaust on these self-contained models has been beneficial in areas where hot exhaust air poses a problem, such as: Produce, Front, Ends and against walls or fixtures.

This system allows your merchandisers to bring refrigerated products into the center of your produce racks, introducing cross merchandising with related products, without jeopardizing the integrity of the surrounding produce.

Top exhaust of condenser air will make shopping conditions more comfortable for customers at the front end while checking out, giving you your last impulse opportunity.

Available on all MMR Case Models

3PSNA-60 & 3PSNA-68
